"How can a book write itself?

This means that it's written thanks to inspiration, automatically.

Korina is the medium, the vehicle, for bringing information from elsewhere, not her mind.

This information comes from non-linear time. From levels beyond physical space. As the author explains, the intuitive ability of the heart plays a pivotal role in the book, the association with the worlds of the light, dreamworlds.

Worlds where Fairies live, where imagination and dreams make up the reality. This book opens up ways of communication with parallel universes. Read it and step into magic worlds."
